

**Alessandro Natale MSc**  
**Geotechnical Engineer – Drilling Operations Manager**

Alessandro Natale obtained a degree in applied Geology from University of Bologna with a thesis in geological and geo-mechanical surveying.

In 2004 Alessandro joined GeoNet, as a geo-environmental site engineer. In this position he performed several geo-environmental site investigations and supervised drilling rigs for environmental, Geotechnical, piling and geothermal work.

Alessandro joined Hydra Srl, a drilling rig manufacturer based in Bologna, as a Technical Sales Manager and R&D Engineer in 2005. Whilst in this position he travelled extensively worldwide to develop the company brand.

Alessandro joined Ecologia in 2006 as geotechnical engineer with aim to provide geotechnical and drilling expertise to the drilling division.

In 2008 Alessandro has been appointed as drilling operations manager with the task of supervising and developing our busy drilling division. His European experience is proving useful in making Ecologia compliant to the changes that introduction of Eurocode 7 will bring into the UK geotechnical and drilling practices. Alessandro is fluent in Italian, English, French and Spanish. This has proven extremely beneficial in supporting Ecologia's drilling crews operation throughout the UK, Europe and Africa.
