

Environmental Policy

The Environment is at the core of Ecologia's business. Sustainability and protection of the environment influence the decisions that we make and are incorporated and promoted within the services that we provide.

We are committed to conducting our operations in an environmentally responsible manner by:

- Assessing the environmental aspects of our activities and seeking to minimise their impact and prevent pollution;
- Implementing an effective, risk-based, management system that meets the requirements of **BS EN ISO 14001:2015**;
- Ensuring compliance with all relevant environmental legislation and with codes of practice, industry standards and other requirements, such as those specified by our clients;
- Incorporating environmental considerations into project planning, system design, procurement and site operations.
- Promoting sustainable development by conserving energy, materials and resources through minimising consumption, maximising efficiency and effectively managing waste;
- Building relationships with our supply chain that promote the improvement of environmental performance;
- Demonstrating visible leadership and ensuring staff at all levels understand the importance of the **Integrated Management System** and their contribution to its effectiveness, and ultimately, the environmental performance of the Company;
- Providing sufficient resources and appropriate training to manage our impacts effectively and maintain high standards of technical competence;
- Setting measurable objectives, monitoring progress and seeking to continually improve our business processes and enhance environmental performance;
- Reviewing this Policy to continuously reflect the environmental context of our organisation.

Our Environmental Policy will be made available to interested parties on request.

Signed:

Managing Director.
